

FLY-WEIGHT EVO

REF.NO. 2C43900

Hot-forged light alloy carabiner with wire gate, ideal for mountaineering, multi-pitch sport climb and big wall.

Main features:

- ultra-light and compact (only 25 g!);
- light and crafted shape, for a better grip;
- double T beam construction, for an excellent weight / strength ratio;
- form of the nose reduces the possibility of the rope and/ or the anchor getting caught during removal.

Also available in [FLY-WEIGHT EVO PACK](#), a 5-color variety package, suitable for putting together your own lightweight quickdraws, or to use with your friends.
