

Dragonfly

Micro Cams & Offsets

Versatile protection for narrow cracks and small pockets. The ten cams cover placements from 7.8 to 28.3mm.

We have also evolved the celebrated DMM Dragonfly Cam range to now include the Dragonfly Offsets, which alongside the Dragon Cams create the ultimate cam family.

Designed for irregular, flared cracks and pin scars, the Dragonfly Micro Cam Offsets feature colour coded slings and thumb loops that allow you to make the correct placement when it matters most.

Dragonfly Micro Cam

FEATURES

- 13.75° camming angle- proven optimum combination of holding power, range and performance
- TripleGrip lobes with a 'raw alu' surface - improved grip
- Ergonomic thumb loop and trigger - easy to handle
- Flexible stem cable - minimises walking
- Narrow head width - fits small pockets
- Compact trigger bar - allows deep placements
- Colour coding - quick and easy identification
- Extendable 11mm sling with compact stitch pattern - extend either strand
- Complement Dragon Cams - size 4, 5 and 6 Dragonfly micro cams overlap with size 00 to 1 Dragons

Dragonfly Micro Cam Offsets

ADDITIONAL FEATURES

- Offset cam sizing for irregular cracks and pin scars.
- Trigger for quick distinction from normal sizes
- Colour coded lobes
- Sling colour corresponds to size of larger cams, thumb loop tubing colour corresponds to size of smaller cams
