

Haul bag designed specifically for a big-wall day climbing, as rucksack for alpine routes and for carrying the equipment.

Main features:

- generous volume of 40 L, expandable to 50 L;
- made from durable polyester coated PVC fabric;
- haul webbing in two different lengths;
- roll-up closure for easy access and packing;
- ergonomic removable padded shoulder strap and hip belt – back panel;
- two gear loops and zip pocket inside, two vertical frontal handles;
- bag-bottom cross webbing attachment points for clipping a portaledge or a subbag.
