

## **Laser Compact 1 Footprint**

### **Short Description**

The Laser Compact 1 Footprint provides additional protection by sitting under the groundsheet and porch area.

### **Long Description**

#### **Laser Compact 1 Footprint**

Although we are confident that our Terra Nova products will outperform any similar groundsheet fabric available, we recommend the use of a footprint to provide increased protection against sharp objects.

- This footprint is compatible with the Laser Compact 1 tents.
- The footprint is sized to fit under each model's flysheet, covering the inner tent and porch area.
- Attaches to the tent peg-out points using shock cord loops.

This can also be used with our 'fastpack' system, allowing you to use the footprint and flysheet without the inner.

### **Guarantee**

This product is guaranteed to the original owner against defects in materials and workmanship for a period of 1 year from purchase.
