

## **Laser Compact 2 Tent**

### **Short Description**

Taking inspiration from the multi-award-winning Laser Competition, the Laser Compact 2 is a more compact version of the tent, with a pack size of just 30cm long. Winner of the UK Outdoor Industry Awards 2019 for Tents and Awnings.

### **Long Description**

#### **Laser Compact 2**

The Laser Compact 2 is designed for backpackers, travellers and cyclists looking for tried and tested kit. When the Laser design was released in 2004 it sparked a remarkable trend for lightweight tent development and the Laser design became the de-facto standard for lightweight tents. With a good balance of durability and very low weight, this tent is suitable for medium-duration backpacking trips, perfect for spring to autumn weather conditions.

- New for SS22 – now with factory silicone sealed main seam.
- New for SS22 – now supplied with Terra Firma Mini Pegs.
- The compact pack size of only 30cm allows for optimal positioning within your backpack.
- We've included a handy webbing loop at the bottom of the flysheet door to accommodate a trekking pole, enabling you to create a useful canopy.
- With 20 denier flysheet fabric, the flysheet and inner come attached, so the tent can be pitched quickly and easily as one.
- Best suited to ground conditions where pegging out is a possibility, the low-profile design ensures a stable structure along.
- Included are Dyneema reflective guylines that are three times stronger than standard guyropes, adding extra support.
- Two vents, one at each end of the tent to help reduce condensation.
- FastPack option – use with the flysheet and groundsheet protector for an even lighter shelter.
- Although it is a 1-person tent for overnight stays it could also be used as snug accommodation for 2.
