

NIMBLE FIXBAR SET NY PRO

REF.NO. 2E688

Extremely robust, ergonomic and lightweight quickdraw with elevated workloads. Ideal for sport climbing, for intensive use and for working a route.

Upper carabiner with the new best-grip gate and catch-free closure; lower carabiner with a hot forged ergonomic gate and catch-free closure for easy rope insertion/removal.

Equipped with an ergonomic and robust polyamide sling in variable widths (25/16 mm), with the rubber retaining bar FIXBAR which prevents the top carabiner from rotating around the sling and/ or anchor, avoiding the possibility of cross-loading the minor axis of the carabiner and with the FIXIT rubber fastener on the lower carabiner, which prevents accidental rotation during use and protects the sling from wear and tear.
